## THEMIS—THE FEMININE ARCHETYPE OF HEALING

**PAMELA DONLEAVY, JD**

LECTURE: Born a Titan, Themis was often hailed as the incarnation of eternal, inexhaustible Earth herself, and brought an ancient wisdom to the ordering of the world of gods and humans. Themis is still with us today as Our Lady Justice, the blindfolded woman draped in Greek robes who holds the scales of justice in her left hand and sword in her right. In this lecture, she explores many of the lost aspects of this ancient goddess and illustrates how Themis' archetypal power is available as a source of healing in a Jungian analysis.

## FEMININE AUTHORITY— EMPOWERMENT THROUGH ANIMUS DEVELOPMENT— **SHARON MARTIN**

LECTURE: Drawing on the work of Jung, von Franz, Carotenuto, Young-Eisendrath, Harding and life experience, Martin discusses the re-discovery of feminine authority via relationship with the animus as center of inner psychic equilibrium. She explores the negative masculine as the key to transformation as he makes himself known through dream images, neuroses and stories. Finally, she describes the emergence of the positive masculine as source of power and bridge to wholeness.

## ANIMALS— OUR SOULFUL COMPANIONS **SUSAN OLSON**

LECTURE: Recently I have found myself fascinated by dolphins, whales, and (to my great surprise!) giant pandas. These animals are at home in the wild and will never be domesticated. And yet they form relationships with humans and seem to be as curious about us as we are about them. What does our interest in these appealing creatures have to tell us about our own wild and untamed nature? This lecture includes stories, images, and film clips of meetings with creatures living on the edge between nature and culture, wilderness and civilization.

## CHEROKEE MYTHOLOGY IN JUNGIAN PERSPECTIVE **G. KEITH PARKER, PHD**

LECTURE: The ancient Appalachian wisdom of the Cherokee is a rich source of myth and story that can still speak to us today. This presentation focuses on the Cherokee and their myths as described in Parker's recent book, *Seven Cherokee Myths: Creation, Fire, the Primordial Parents, the Nature of Evil, the Family, Universal Suffering, and Communal Obligation*. Some Jungian observations are made.

## LOVE, GRIEF & MOURNING WORK- ING IN THE SOUL'S DARK LIGHT

**ROBERT ROMANYSHYN, PHD**

LECTURE: The inability to mourn and the necessity to do so are the problems of our time. Following Jung's approach to the psyche, this talk shows how an imaginal view of the mourning process is a work of transformation that serves the task of individuation. The myth of Orpheus and his beloved Eurydice serves as the container for the themes of this talk. As a mythic presence Orpheus is an archetypal figure who bridges the gap between daylight and darkness. In mourning we are guided by Orpheus in the dark light of soul on our journeys of homecoming.

## INTELLIGENT DESIGN? WHAT WOULD CARL JUNG SAY?

**PETE WILLIAMS, PHD**

LECTURE: In this lecture, we bracket aside our political, religious or philosophical responses to the evolution/intelligent design debate in an attempt to gain some insight into the psyche's perspective on the question. My hope is that we can all become curious psychological detectives as we wonder together why this old debate is resurfacing with such energy behind it. We need to ask; why this question, why now, and what might be the psychological meaning of it all?
